Education

National Institute of Technology, Warangal

Bachelor of Technology, Computer Science and Engineering

2024 – 2028

CGPA: 8.54/10

Experience

ServiceNow

AI Accelerate Fellow

Jun 2026– Aug 2026 (Ongoing)

Virtual + Hyderabad (In-Person)

- Selected from thousands of applicants across India for **ServiceNow's AI Accelerate Bootcamp**, a competitive cohort-based (batch of 20) program in **Agentic AI** covering **transformer architecture & attention mechanisms**, **embeddings**, **LangChain/LangGraph** orchestration, **ReAct & chain-of-thought patterns**, and **prompt engineering**
- Architecting and building an end-to-end AI agent** as a capstone – implementing tool use via **Model Context Protocol (MCP)**, **multi-agent orchestration**, and **fine-tuning**, to be evaluated using **LLM-as-Judge** rubrics and **red-teaming** and defended before a panel of **ServiceNow engineers and leaders**
- Applying **AI Safety principles** – guardrails against hallucination, prompt injection, and behavioral drift – to enterprise agentic pipelines at scale within **ServiceNow's platform**

Eizen.ai

Software Engineering Intern

Nov 2025– Dec 2025

On Site

- Benchmarked 10+ TTS/STT models and LLMs** to architect the core stack for an **AI Therapist Platform** – integrating **Deepgram** with optimized audio buffering to cut speech latency
- Architected and deployed an **audio diarization pipeline** processing **500+ hours** of recordings using **Librosa** and **PyDub** – surfacing critical speech patterns via **visualization dashboards** to enable data-driven model training
- Built a **computer vision system** for unsupervised crowd anomaly detection – combining **YOLO-based pose detection** with **LSTM encoders** to achieve **92% accuracy** on a custom-built dataset

InnobeV Solutions Pvt Ltd

Digital Marketing Strategy Analyst Intern

Sep 2025– Dec 2025

Remote

- Designed **data-driven B2B messaging strategies** by synthesizing **stakeholder interviews** with **market, regulatory, and procurement** research for the beverage formulation sector
- Owned full **social media pipeline** – building an **end-to-end content marketing framework** aligned with industry events and targeted at technical buyers in **B2B manufacturing**
- Boosted **organic search visibility** by executing a targeted **SEO strategy** and identifying keyword gaps through **competitive analysis** of **15+ beverage companies**

Projects

Folio – AI Study Assistant

React, FastAPI, Python, Gemini API, pgvector, Supabase

2025 – Present

[GitHub](#) | [Live Site](#)

- Engineered a **full-stack AI study platform** – **React + Zustand** frontend with a resizable split-view workdesk, **FastAPI** backend with JWT-authenticated routes, **Google OAuth** via Supabase Auth, and background PDF ingestion that never blocks upload response
- Built a **from-scratch hybrid RAG pipeline** (no LangChain) – PyMuPDF extraction → paragraph-boundary chunking → Gemini **text-embedding-004** → pgvector cosine similarity – injecting current-page and globally-retrieved chunks into every prompt
- Streamed LLM responses over **SSE** using **Gemini 2.0 Flash** with fallback to **Groq Llama 3.3 70B** on quota exhaustion; integrated **PDF.js v4** with custom text layer enabling highlight-to-ask (Explain / Define / Summarise) from selected PDF text

SplitLedger – Group Expense Splitting Platform

React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Docker

2026

[GitHub](#) | [Live Site](#)

- Built **SplitLedger**, a **full-stack, indie-themed Splitwise-style expense splitter** where every balance is **derived live from a 6-table relational ledger** (expenses, splits, settlements) instead of stored – structurally eliminating an entire class of balance-drift bugs
- Designed a **greedy minimum-transaction settlement algorithm** as a pure, unit-testable function that nets group debts and **guarantees settlement in at most $n - 1$ payments**; all money math runs in **integer cents** to eliminate floating-point errors
- Hand-rolled **JWT authentication** (access + refresh tokens, httpOnly cookies, bcrypt, silent session refresh) and an **invitation-based membership system** with balance-guarded exits, enforcing every business rule server-side with **transactional multi-table writes**

Technical Skills

Languages: JavaScript/TypeScript, Python, C++, Java, SQL

Core CS Concepts: DSA, OOPS, OS, DBMS

Frontend/Backend: React, React Native, FastAPI

Databases: Supabase, Oracle SQL, PostgreSQL (Basics)

Tools: Git, Figma, Vercel, Render

Achievements

Led NITW's Swim Team to win Silver and Bronze medals at the All India Inter-NIT Aquatics Championship 2025

Certified WhiteHat Jr Trainee
